I am writing to ask that you reject NAB petition 04-160 regarding satellite radio programming. I subscribe to XM Radio and have come to rely on the helpful and unique information they provide on their traffic and weather channels. I live in Champaign, IL (approx. 130 miles south of Chicago), and I travel to Chicago frequently. XM radio provides information on Chicago weather and traffic that I can't otherwise get down here, which makes my planning much easier. So please reject the NAB's petition and allow XM satellite radio to continue to provide these services. Thank you.
